

Title

Open Space

Have a testing issue you would like to discuss with like-minded people?

To whom is the session addressed?

To all the delegates who would like to discuss with like-minded people current problems and questions within the topic of Software Quality and Testing.

Keywords

Of your own choice!

Abstract

Open Space shall give us the opportunity to focus on those questions that are important to YOU! Take the chance of an open floor to freely articulate and discuss what needs to be discussed in your opinion!

Five main principles characterise the method of the Open Space method:

- Whoever attends is the right person
- Whenever it starts is the right time
- Whatever happens, happens
- When it's over, it's over
- The basic law is: The Law of the Two Feet (Go where you need to go and do what you need to do)

Just take a piece of paper at the check-in desk and write the topic on it. Paste it to the agenda pin board near the check-in desk. Add your name if you want to chair the session!

Three to five topics will be selected by all attendees at the Networking Cocktail Event, Wednesday evening. On Thursday morning there will be a short introduction in the plenum. Afterwards you will go into smaller groups for 45 minutes of discussion. All results will be collected by the Open Space chairs and send to all delegates after the conference.

More discussion space will be provided at our LinkedIn [ignite-group](#).
